

Smart One SAP Analytics Cloud Package for Mill Products

by ISS Consulting (Thailand)

ISS Consulting provides a qualified packaged solution for SAP Analytics Cloud. The real-time analytics capabilities of SAP Analytics Cloud not only helps businesses answer difficult questions in just a few clicks, but also allows data blending from different sources to create attention-grabbing visualizations and discover new insights anywhere anytime. Integrated with planning, predictive analytics and business intelligence, SAP Analytics Cloud enables businesses to make sound decisions supported by data, respond faster in the digital market, and plan for the future in one single product.

Desire to work with a single vendor to supply core analytics functionality for Business Intelligence, Planning and Predictive use cases

Inability to access and share timely, relevant, and trustworthy information that can help steer the way to confident business decisions

Unidentified business logic

No formal platform for collaboration

Insight is based on offline data which leads to flawed decision making and loss of agility resulting in missed opportunities and cost escalation

No single version of truth

Business Challenges

Benefits
